Approved For Release 2000/08/28 : CIA-RDP78-04718A000300070020-1

Mr. Carlton C. Massey
County Executive
Fairfax, Virginia

Dear Mr. Massey:

Document No. <u>021</u>	OCT 15 1957
No Change in Class. <input type="checkbox"/>	
<input type="checkbox"/> Declassified	
Class. Changed to: TS S C	
Declassify on: _____	
Auth: 100-3	
Date: _____	By: _____

We have read with considerable interest the recent newspaper articles indicating that the Board of Supervisors of Fairfax County has received their consulting engineer's report on the proposed expansion of the county's sewage disposal system to accommodate the anticipated population growth within the county.

Our Architects, [REDACTED] and representatives of the Public Buildings Service and this Agency are anxious, of course, to discuss engineering details of this system, as related to the proposed Central Intelligence Agency Headquarters building. The point of connection between the sanitary sewers on the site and the county's overall sewage system is one of the mechanical design details that will have to be determined. In view of the receipt of the engineer's report by the Board, it is hoped that an early solution may be obtained to this and other engineering problems which influence greatly the completion date of our plans. The schedule for our planning and construction as outlined in our June 20, 1957 letter to you is being maintained, and we continue to expect completion of construction drawings for the project by next April.

If you or your consultants have a need for information which we can provide, please feel free to call upon us. We sincerely appreciate the cooperation and assistance we have been receiving in this matter.
